---

As a Full Stack Developer, I have experience working on client projects, playing a dual role. I have specialized in implementing solutions using Firebase for database management and authentication. My expertise in JavaScript (JS), TypeScript (TS), and React has been key to developing high-performance web applications.

I have worked directly with clients to understand their needs and translate them into effective technical solutions. My ability to contribute both in coding and in team organization has been crucial to the success of our projects. My achievements include effectively overseeing project progress and actively collaborating with my colleagues to meet our goals. These experiences have allowed me to develop strong problem-solving skills and effective communication. English level B2 (Intermediate).

**Programming Languages:** TypeScript, JavaScript

**Framework Tools:** React, Next.js, Redux Toolkit, Tailwind, Express, React Native

**Databases:** Firestore, PostgreSQL

**Tools:** Git, Jira, Slack, GitHub

**Agile:** Scrum

## Professional Experience

### Technical Agent Developer

Vozy – Colombia

March 2024 – Present

In my role as a Technical Agent Developer, I have worked on automating tasks and processes in collaboration with different teams, using tools such as Make, Zapier, and JavaScript. Additionally, I have led the development of innovative solutions based on artificial intelligence. My main responsibilities include:

- Automation of workflows and repetitive tasks to optimize internal operations.
- Custom development of middleware and platforms to meet specific client requirements.
- Design and development of AI agents for customer debt collection management, including reminders, payment follow-ups, and commitment handling.
- Creation of conversational agents focused on enhancing customer experience and efficiently resolving inquiries.

**Full Stack Developer**

GPEsportsRD - Dominican Republic.

June 2023 – March 2024

I worked on the development of various tools for controlling and organizing Formula 1 tournaments, using a tech stack that includes Node.js, React, Socket.io, and Electron. My main responsibilities included:

- Development of Discord and WhatsApp bots using Node.js and Discord/WhatsApp APIs.
- Implementation of real-time data handling for Formula 1 tournaments using Socket.io.
- Creation of desktop applications for OBS (Open Broadcaster Software) management using Electron and React.

In this role, I worked as a Full Stack Developer, constantly adapting to new technologies to meet project demands and effectively perform my tasks.

**Full Stack Developer**

Alma Cannabica – Argentina.

February 2023 – April 2023

At Alma Cannabica, my role covered the design, programming, and optimization of our digital platforms to create an exceptional user experience. Key responsibilities included:

- Designing front-end interfaces and elements to ensure a rewarding and secure user experience.
- Developing landing pages, dashboards, and components using advanced technologies.
- Continuously maintaining and optimizing our website and interfaces to facilitate and secure the purchasing process.

**Full Stack Developer**

Sumak Kawsay – Colombia.

At this company, I had the privilege of serving as a Full Stack Developer and UX Designer. My role was crucial in creating an intuitive and easily accessible platform for purchasing cryptocurrency. My main responsibilities included:

- Designing and conceptualizing the website to provide an intuitive and enjoyable user experience, with a responsive design to ensure accessibility across various devices.
- Programming the website using advanced technologies such as Next.js, Rainbowkit, and Tailwind CSS, ensuring optimal performance and smooth navigation.
- Collaborating closely with the team to develop a coherent vision aligned with the company's goals, in line with the concept of a new era of community-driven wealth.
- At Sumak Kawsay, I had the opportunity to contribute significantly to the project of creating a cryptocurrency that empowers users, allowing them to shape the future of the financial ecosystem in an inclusive and collaborative way.
